ESBR03B

Baseplate model

An easy way of converting street-located car spaces to a parking facility of up to 12 bicycles. Ideal for local governments to provide temporary or permanent secure bicycle parking.

This basic model is both a practical and economic option for installing a bike corral system.

Material Specifications (General)

Rack 50 x 50 SHS Mild Steel / 32NB (38.1) x 1.6mm pipe / Galvanised / Powder coated in a range of colours
